INCIDENT COMMAND SYSTEM (ICS)

ICS is a standardized hierarchical structure that allows an organization to work through an event or emergency using combined efforts with focus on safety, logistics, operations, finance, planning and management. Our course teaches your leadership team how to build and operate a customized ICS.

KNOWLEDGE
SAVES LIVES, INC.

EXPERIENCED INSTRUCTORS

Our team of professionals include subject matter experts who have real world experience serving as incident commanders, public information officers, safety officers, Liaisons and other ICS Roles in major emergency events.

TARGETED CURRICULUM

Our ICS tabletop workshops are specifically designed to meet the specific needs of your organization and staff. We will help create individual action plans that can be updated and practiced to best suit your continuity of operations plan.

WHAT TO EXPECT

You provide the location and the dedicated time frame of the workshop and we do the rest. We will create a customized training plan and provide all the materials and learning objectives to get your Incident Command Team on the right track.
