

# Custom Training

Knowledge Saves Lives, Inc. is California's leading law enforcement-based consulting and training firm, offering customized safety solutions backed by real-world experience. Since 2010, the organization has supported schools, government agencies, healthcare systems, faith-based institutions, and private businesses in building safer environments. Each project is led by subject matter experts with backgrounds in law enforcement, fire services, military operations, and emergency response—many of whom have been directly involved in high-profile critical incidents. Through a hands-on, practical approach, Knowledge Saves Lives equips organizations with the insight and tools necessary to prevent, respond to, and recover from emergencies.

With more than a decade of experience, Knowledge Saves Lives brings credibility, field-tested insight, and precision to every engagement. Custom training projects are approached with a commitment to practicality and clarity, ensuring solutions are both actionable and sustainable. The firm's advisors have held leadership roles in public safety and contributed to safety advancements at the local, regional, and state level. Their expertise includes compliance with best practices, threat mitigation, and the design of safe and secure learning and working environments.

Knowledge Saves Lives exists to help organizations prepare for the unexpected, protect their people, and strengthen emergency readiness. Training services are designed to empower leadership teams with high-quality, expert-driven guidance that supports effective decision-making and long-term safety planning.
