

Emergency Trauma Kit (ETK)

Knowledge Saves Lives, Inc. is California's leading law enforcement-based safety consulting and training firm, trusted by schools, government agencies, healthcare providers, faith-based institutions, and private businesses since 2010. Our team of seasoned instructors includes experts in law enforcement, fire services, military operations, and emergency response—many of whom have been directly involved in critical incidents across the country. Through practical, hands-on training and tailored safety solutions, we help organizations prepare for, respond to, and recover from emergencies with confidence.

One of our most innovative tools is the KSL Emergency Trauma Kit (ETK)—designed by first responders to provide life-saving equipment that anyone can use in a crisis. Each compact, vacuum-sealed kit contains military and law enforcement-grade tools to prevent blood loss and treat life-threatening injuries. Color-coded components match a Quick Start Guide for stress-free application, and each kit includes a QR code linking to certified STOP THE BLEED® training and a step-by-step instructional video.

Manufactured, assembled, and shipped in the USA, the ETK is durable, accessible, and built to last with a 3-year shelf life. The transparent, FDA-approved packaging ensures everything is visible and ready when seconds count. We are proud to be the only trauma kit on the market that includes certified training at no extra cost—empowering users with the knowledge and tools to save lives in any emergency, not just incidents of violence.

Each

Reasons to Keep an ETK on Hand

- **Time Saves Lives:** In a trauma situation, every second matters. Immediate intervention can stop severe bleeding, open airways, and stabilize injuries before emergency services arrive.
- **Built by Experts:** Developed by former law enforcement, emergency responders, and medical professionals, our kits include only the tools that matter—nothing extra, nothing wasted.
- **Tailored for Any Environment:** Whether you're a school administrator, safety coordinator, or a parent, our kits are compact, easy to use, and built for fast deployment in high-stress situations.
- **Meets Industry Standards:** Each kit includes components aligned with the Stop the Bleed initiative and other nationally recognized emergency response protocols.
- **Peace of Mind:** Being prepared isn't just about compliance—it's about protecting the people who matter most.
